

# Prototype 37-C → *Prototype 37-C*

99% PEPTIDE FORMULA

Retail: \$149.99

Associate: \$79.99

30CD (Commissionable Dollars)

## *Ingredients:*

SynColl, Acetyl Octapeptide-3, Acetyl Hexapeptide-8, Pentapeptide-13, Matrixyl 3000™, Eyeseryl®, Hyaluronic Acid

*Prototype 37-C* is the ultimate anti-aging serum with 99%peptides. We can see from the name, *Prototype 37-C* has been sampled, tested, and proven to work after developing hundreds of formulation. This is everyone's dream product. *Prototype 37-C* not only helps stop the aging process but, reverses the aging process by removing wrinkle and healing the age spots.

*Prototype 37-C* is the first of its kind to use an exclusive formula containing patented peptide ingredients from all over the world-(Germany, France, Swiss, Spain, and Korea). This collection of the best and most effective peptides was specifically engineered to actively remove wrinkles, stimulate collagen synthesis, improve elasticity, and reduce puffy eye bags.

## → *What Makes Our Peptide Formula Superior*

>> SYN-COLL is patented innovative peptides with many years of research. This bio-active ingredient was developed to deeply penetrate the skin and remove any type of wrinkle and to repair existing stretch marks. SynColl has shown excellent collagen building capacity and increased collagen synthesis stimulation by 119% compared to the positive standard of human fibroblasts levels.

>> Matrixyl 3000 contains the matrikines Pal-GHK and Pal-GQPR acting in synergy to repair the cutaneous damages of age. Matrikines of Matrixyl 3000 are messengers of cutaneous restructuring and repair. They activate the neo-synthesis of extracellular matrix macromolecules providing Matrixyl 3000 with a visible anti-wrinkle efficacy. Matrixyl 300 has been shown to decrease in wrinkle density by 33%, decrease the volume of wrinkles by 23%, and decrease depth of wrinkles by 20%.

>> Eyeseryl- As the skin loses its elasticity and muscles weaken through age, loose skin can accumulate around the eyes, forming folds in the eyelids. Fat, which cushions the eyes in their sockets moves forward out of the ocular cavities and accumulates in bulging bags around the eyelids. The other reason for puffy eyes is water accumulation. Eyeseryl is a tetra-peptide with anti-oedema properties with a proven efficacy in reducing puffy eye bags. Study shows that eyeseryl achieves a reduction of puffy eye bags in only 15 days!!
