## → épuri Purifying Foaming Cleanser

Providing the right pH level is essential to your skin. Particularly for your face, it is vital to have the right cleanser to provide the balance that your skin needs. The healthy pH level for your skin should be 4.5 to 6.5. But, most soaps are made with pH levels from 10~13. With the luxurious épuri Purifying Foaming Cleanser, you will achieve the perfect pH balance of your skin while keeping moisture in your skin. épuri Purifying Foaming Cleanser is scientifically formulated to work with your skin to bring it to the healthy pH level of 5.5. épuri nutrient-rich cleanser contains 7 different organic vegetables to give all the vitamin and minerals your skin thirsts. épuri Purifying Foaming Cleanser deep cleans and clarifies pores by foaming creamy lather covering to facial skin and moisturize. Try our épuri Purifying Foaming Cleanser and you will never want to wash your face with anything else again.

## → What Makes Our Foaming Cleanser Superior

It's well known that the skin is the first line of defense against the elements, such as microorganisms, dangerous UV rays, and pollutants. And the skin's acid mantle, a fine film with a slightly acidic pH on the surface of the skin, provides vital protection for the skin. Acid mantle protects the skin from bacterial and fungal infections. Our revolutionary épuri Purifying Foaming Cleanser helps strengthen acid mantle by keeping skin at pH of 4.5 to 6.5 and provide moisture by using the following ingredients:

>> 7 kinds vegetables (Celery, cabbage, Tomato, Carrot, Broccoli, Rice, turnip) – These special blends of vegetables are full of natural vitamins and minerals that the skin thirsts. These 7 effective blends will not only supply all the nutrients you need but, it will detoxify and moisturize skin.

>> Hyaluronate acid - Along with collagen, hyaluronic acid is the other big product used in the fight against wrinkles and hold moisture in the skin. Hyaluronate acid is found in large quantities in our bodies in youth, but study shows that it gets destroyed as a person age. At 50, we only have 50% of our hyaluronic acid stock left.

>> Tea - An excellent cleaning property, since it is derived from coconut it has less irritation than chemical cleaning properties.

>> Allantoin - Promoting wound healing and tissue formation, Allantoin is widely used as an effective skin softener and anti-irritant.
